1.

1 / 1 poin

Which of these are terms used to refer to components of an artificial neural network? (hint: three of these are correct)

- ☐ axon
- ☒ activation function

✔ Benar

Yes, an activation is the number calculated by a neuron (and “activations” in the figure above is a vector that is output by a layer that contains multiple neurons).

☒ layers

✔ Benar

Yes, a layer is a grouping of neurons in a neural network

☒ neurons

✔ Benar

Yes, a neuron is a part of a neural network

2. True/False? Neural networks take inspiration from, but do not very accurately mimic, how neurons in a biological brain learn.

1 / 1 poin

- ☒ True
- ☐ False

✔ Benar

Artificial neural networks use a very simplified mathematical model of what a biological neuron does.
